

LIFESENSE®

# Inner Ear Thermometer

## Infrared Device

### FACT BOX

**Product Code:**  
**MD1882**

**Product Category:**  
Diagnostics

#### Contents:

- 1 x In-Ear Device
- 1 x Magnetic Cap
- 2 x AAA Batteries
- 1 x Storage Bag
- 40 x Disposable Probe Covers

#### Warning:

Please keep this infrared thermometer out of children's reach. Medical assistance can't be replaced by the use of an infrared thermometer. This infrared thermometer is not waterproof.

Keep it away from water.

Do not force the temperature probe of the thermometer into an ear canal. Otherwise, the ear canal may get injured. The result may be inaccurate if you use the overdue thermometer.

The measurement results are for reference only. It is dangerous to make a self-diagnosis or self-treatment based on the obtained measurement results.

For such purposes, please consult a doctor.

The Medicare LifeSense® Infrared Inner Ear Thermometer is a reliable and hygienic medical device, offering accurate temperature readings while prioritising user convenience.

With its disposable probe covers, the thermometer ensures hygienic usage by preventing cross-contamination and maintaining measurement accuracy, addressing common concerns related to earwax interference. This feature not only enhances the overall cleanliness of the device but also contributes to its precision, making it a trustworthy health monitoring tool.

#### FEATURES:

- Fast, 1 second reading
- Child and silent mode options
- Auto shut-down after 10 seconds
- Audible and visual fever warning
- Magnetic probe cap
- Suitable for children 3 months and up

#### INTENDED USE:

The Infrared Thermometers take human body temperature via the eardrum for both professional and home use.

#### OPERATING PRINCIPLE:

The infrared temperature sensor collects infrared energy emitted by the eardrum. After being focused by a lens, the energy is converted into a temperature reading by the thermopiles and measurement circuits.
