The Medicare LifeSense® A2 Blood Pressure Monitor is an automatic upper arm blood pressure monitor designed with both comfort and accuracy in mind. This easy to use home monitor features a large wide angle display for easy reading of results along with a comfortable fit cuff. With memories for up to 3 users and fast accurate measurements, monitoring your blood pressure at home couldn't be simpler.

FEATURES

- Automatic upper arm blood pressure measurement.
- One touch measurement.
- Irregular heartbeat detection.
- Easy to read wide angle display.

DIRECTIONS:

1. Make sure you are relaxed before you begin.
2. Roll up your sleeve and fasten the cuff 2-3cm above your elbow bend. Rest your arm with your palm facing up. Try to avoid moving or talking during measurement.
3. Press the power button  to begin measurement. It will automatically stop when the measurement is completed.
4. Your results will appear once the device has stopped.

RECOMMENDED USE:

Blood pressure monitoring.
