58mm x 80mm.

Contents:
x10 patches per box.

Breathable

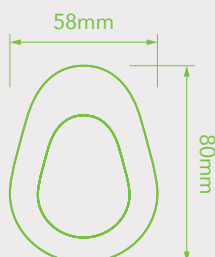

Hypoallergenic

Sensitive

Non-Adherent

Medicare Fever Patches are cooling, menthol-infused adhesive patches that help soothe and calm fevers as well as high temperatures. With an extra-strong adhesive and up to 8 hours of lasting power, these patches are a great hands-free way to help reduce your temperature. They are also gentle on the skin and safe to use with medications.

FEATURES

- Hypoallergenic and Latex free. Skin friendly due to hypoallergenic adhesive.
- Highly Breathable. Allows air to reach the affected area.
- Sensitive. Non-Woven backing for sensitive skin.
- Non-Adherent pad. Non-stick absorbent pad.

INSTRUCTIONS FOR USE:

1. Wash hand and eyes before use.
2. Close your eyes and keep them relaxed, don't close them tightly.
3. Place the eye patch in the middle and clear the periphery, so that the narrower end of the fixed position is close to the nose.

RECOMMENDED USE:

For use as occlusion therapy for common childhood eye conditions, such as lazy eyes and crossed eyes. May also be used after surgery or if a person has a sensitive or damaged eye.
